OBJECTIVE

Recent graduate and Python full-stack developer eager to build robust web applications. Seeking a challenging position to contribute to dynamic projects, collaborate, and enhance expertise in full-stack development.

EDUCATION

Bachelor of Engineering in computer science

Aug 2019 - Oct 2023

Jansons Institute of Technology, Coimbatore

- It deals with the design, maintenance, construction and operation of computer hardware and software.

PROJECT WORKS

E-commerce Website

Jan 2024 - Present

- Visually appealing display of products on the e-commerce website, categorized based on product types.
- Router concept implemented for easy navigation, allowing users to understand the current path and easily explore different sections.
- Clicking on a product seamlessly renders its details, enhancing the overall user experience.

Expense Tracker

Oct 2023

- Sleek UI-driven expense tracker crafted with JavaScript, HTML, and CSS.
- Leverages internal storage for seamless balance tracking, relieving users from manual efforts.
- Promotes financial mindfulness by efficiently managing and displaying daily expenses, aiding in curbing unnecessary spending.

Student Management System (Django)

Nov 2023

- Student Management System built with Python Django.
- Enables effortless updating of student information, including adding, editing, and deleting records.
- Streamlines the process of managing student data for efficient administration.

Task Management (React and Django-restframework)

Nov 2023 - Dec 2023

- Task Management App, a comprehensive project, combines React for the front end and Django for the back end.
- Efficiently organizes and manages tasks, providing a user-friendly interface.
- Utilizes React for the frontend and Django Rest Framework for the backend, ensuring a robust and seamless task management experience.
