## EDUCATION

**B.E, Jansons Institute of Technology,  
Coimbatore**

**2019 - 2023**

Graduate engineer with a CGPA of 8.25, showcasing academic excellence and strong engineering capabilities.

## SKILLS

- HTML5
- CSS3
- Bootstrap
- JavaScript
- React
- Python
- Django
- MySQL
- Git, GitHub

## OBJECTIVE

As a recent graduate and aspiring Python full-stack developer, I am eager to apply my skills in developing robust and user-friendly web applications. Seeking a challenging entry-level position to contribute to dynamic projects, collaborate with a motivated team, and further enhance my expertise in full-stack development.

## PROJECT WORKS

### Frontend Projects

#### Live News App

- It's a live news app made with React. It uses a third-party API to provide the latest and updated news.

#### Expense Tracker

- The Expense Tracker is built with Javascript. It helps us keep track of our expenses, making it easier to manage our spending.

### Backend Project

#### Student Management System

- I made a Student Management System using Python Django.
- With this app, we can add, edit, and delete student information easily.

### Full-Stack Project

#### Task Management

- The Task Management App is a complete project that uses React for the front end and Django for the back end. It helps you organize and manage your tasks efficiently.
