Undergraduate Batchlor of Engineering – Fresher

Specialization : **Computer Science**

Objective:

As a recent graduate with a strong passion for web development, I am seeking an entry-level position as a front-end developer. I am excited to apply my knowledge of HTML, CSS, and JavaScript to create engaging and user-friendly websites. My goal is to contribute to a creative team, enhance my front-end development skills, and deliver outstanding user experiences.

Skills:

- HTML
- CSS
- Bootstrap
- JavaScript
- React
- Python Programming

Academics:

Degree	Institute	Board/University	Percentage	Year
B.E	Jansons Institute of Technology	Anna University	8.25	2023
HSC	M.A.M higher secondary school	State Board	77	2019
SSLC	Model School	State Board	88	2016

Project Works:

1. **Expense tracer** : By using expense tracer, user can record and understand all their spendings and review it in a timely manner. With the help of HTML and CSS, I'm able to make the webpage interactive by adding JavaScript. It becomes more interactive to the user and stores the information in the local storage and makes the inserted data available even the page gets refreshing. [Link](#)

2. **Game**: I have created the simple rock-paper-scissor game using HTML, CSS, and JavaScript. It is a webpage contain the pictures of rock, paper, and scissor. If user click one of the pictures the computer selects the random choice using JS Math.random() method, then compare with the users pick and shows the result. [Link](#)

3. **Portfolio**: I created portfolio for my own using Bootstrap. [Link](#)

4. **Shop Here**: This is an E-cart WebApp (SPA - Single Page App) developed by using React JS. I'm working on this project from 24th November and the work is still going. Here I gave the repository link for this project. [Link](#)
